## ADDITIONAL MATHEMATICS

## **International General Certificate of Secondary Education**

Grade thresholds taken for Syllabus 0606 (Additional Mathematics) in the October/November 2011 examination.

	maximum	minimum mark required for grade:			
	mark available	Α	С	E	
Component 11	80	62	26	15	
Component 12	80	67	28	15	
Component 13	80	64	31	16	
Component 21	80	65	32	25	
Component 22	80	68	29	19	
Component 23	80	63	27	13	

The threshold (minimum mark) for B is normally set halfway between those for Grades A and C. The threshold (minimum mark) for D is normally set halfway between those for Grades C and E. Grade A\* does not exist at the level of an individual component.

The thresholds for the **syllabus** are determined first by adding together the thresholds for the components taken by the candidate. A reduction may be made at the higher grades depending on the correlation of the papers. If the maximum raw marks for the components are not in the weighting/relationship specified in the syllabus, a weighting is applied to arrive at the overall thresholds. The A\* threshold is calculated using the difference between A and B as a starting point.

The maximum total mark for this syllabus is 160.

The overall thresholds for the different grades were set as follows.

Option	Combination of components	<b>A</b> *	Α	В	С	D	E
AX	11, 21	141	127	88	58	49	40
AY	12, 22	153	135	90	57	45	34
AZ	13, 23	141	127	88	58	43	29

Grade Thresholds are published for all GCE A/AS and IGCSE subjects where a corresponding mark scheme is available.
